

HYDRAULIC SEPARATOR/COMPENSATOR IN STAINLESS STEEL AISI 304/316

The **SRG Multifunctional Hydraulic Separator** is a device designed for heating and cooling systems. Its primary function is to ensure the independence of the primary and secondary circuits connected to it, effectively compensating for flow rate differences between the circuits.

CODE	CONNECTIONS	A	B	C	D	E
DN 65 220 25	G 1" M/F	560	160	220	180	170
DN 80 240 32	G 1"1/4 M/F	600	170	240	190	200
DN 100 260 40	G 1"1/2 M/F	650	190	260	210	230
DN 125 280 50	G 2" M/F	700	200	280	220	260

Note:

Custom designs and specifications are available upon request.

SLUDGE SEPARATOR WITH COIMBENTING SHELL

A further function of the hydraulic separator is performed by the sludge separator inside the device. It allows the separation and collection of impurities in the system, which are removed by means of the drain valve in the lower part (which can be opened when the system is running).
